

Mounting Instruction Seal Kit

Parts list

Housing	Sealing Tube	Adaptor	Cable Fixer

1) Mount the screws and washers, as illustrated on the picture, on the mast bracket.		<p>Please note that the screws have to be in the correct position!!!</p> <p>Screwing Direction →</p>
2) To mount the housing it is important to mount the screws in the same direction as in step 1.		<p>If the mast is too thick to mount housing this way, do as shown on the picture</p>
3) To prepare the sealing tube, connect the cables as in the picture.		<p>Please remark that you have to stretch the cable with two cable fixer (for each cable one)!</p>
4) When the connection is done, please close the sealing tube		
5) The last is step is to put the sealing tube into the housing.		<p>To fix the sealing tube, please use an additional cable fixer on the bottom of the housing</p>
